

# MURALS WITH SNAPCHAT

## HOW TO MAKE A STICKER

Step 1: **Open Snapchat** – if you don't currently have it, it's free to download!

Step 2: **Take a photo** of what you would like to be your sticker, or choose a photo you already have – read “using an existing photo” at the bottom right

Step 3: **Tap the scissors icon** and **select your sticker subject by drawing around it**. When you're done, it should pop up as a duplicate on your current picture.

Step 4: To access your stickers, **tap the page icon**. There will be many premade stickers you can also add, but to find your own **tap on the scissors icon**.

Step 5: Tap on your sticker to **place it in your photo**

Step 6: **Adjust your sticker** - move it by dragging it with one finger, resize it by pinching in or out with two fingers, or rotate by tilting your two fingers. Do this until you're happy with the placement in your photo

## PHOTO TIPS:

**Take your photo facing straight at your subject – both for your sticker and for where you want to place your sticker**

**Take on a sunny or cloudy day for best lighting**

**Avoid sun/shade differences. If you can, take both the sticker and the placement photo in the same location with the same lighting**

**If you want to try a video, move the camera slowly and steadily. If you have one use a tripod!**

## USING AN EXISTING PHOTO:

**This works for creating stickers, or for backgrounds - try it for both!**

- Tap the **photos icon** (2 rectangles) under the camera (circle outline)
- **Choose a photo** from your past snaps or camera roll, tap to use it
- **Tap the three dots** in the top right corner, then **tap edit photo**

**You can now create a sticker or add a saved sticker to this photo!**
